

Collecting information

This activity will help your child to organise data in a chart. Before beginning, help your child to sort out the cutlery. Please find different numbers of each type of cutlery, and no more than six of one type.

Sort the cutlery at home into different types. Colour in a space for each piece of cutlery in the correct column on the chart.

My cutlery chart

If you have time try to complete these sentences.

There are knives. There are tea spoons.

There are more than

There are fewer than
