

10p and 1p coins

This activity will help your child to recognise tens and units.

You will need a small bag containing nine 10p coins and nine 1p coins, and a different coloured crayon each.

- Take ten coins from the bag.
- Count the number of 10p coins and 1p coins and
- write the total on scrap paper.
- Replace the coins and let your partner have a go.
- Compare your amounts. The person with the largest
- amount can colour a balloon.
- Have ten turns each. Who has coloured more balloons?
